

AMENDMENTS TO THE SPECIFICATION

Please amend Page 15, lines 6-14 of the Specification as follows:

Communication media typically embodies computer-readable instructions, data, data structures, program modules, programs, programming, or routines in a modulated data signal such as carrier wave or other transport mechanism and includes any information delivery media. The term modulated data signal means a signal that has one or more of its characteristics set or changed in such a manner as to encode information in the signal. By way of example, and not limitation, communication media includes wired media such as a wired network or direct-wired connection, and wireless media such as acoustic, radio frequency (RF), infrared and other wireless media. ~~Combinations of any of the above are also included within the scope of computer readable media.~~
